RIVER STONES

When envisioning the River Stone Collection, Jason Phillips was inspired by Nature's ability to shape a hard stone surface into something soft and beautiful. "There is something mesmerizing about the power of water and its effect on even the most durable of forms."

LOG COLLECTION

Imitation is the highest form of flattery. We found some incredible natural logs and cast them in artisan-grade resin. We added a bit of bling through the use of gold and silver leaf and now offer them in gel coat white which works outdoors. Available in a variety of sizes, the Cast Naturals Collection personifies our ethos of modern organic.

CHAMCHA WOOD

Chamcha is a fast-growing Acacia species prized for its richly figured grain and distinct sap line. It is characteristic for these trees to grow crooked with low and heavy branching. This allows for some of the most interesting and organic forms. This irregularity defines the Origins Collection, where we look for exciting shapes that stand out and transform them into functional works of art.

The image features four circular wire tree wall art pieces mounted on a light blue wall. The pieces are made of dark metal and have a complex, branching structure that resembles a tree's canopy. The central piece is the largest, and the other three are smaller, arranged around it. The text 'WALL ART' is overlaid in large, white, sans-serif capital letters across the middle of the image. In the bottom right corner, there is a small potted plant with green leaves. The overall aesthetic is modern and minimalist.

WALL ART

There is something about the Wire Tree Wall Art family of metal sculptures that inspires thoughts of the circle of life. It's not only in the fluidity of the limbs but the overall composition, which was very hard won because each of the sculptures are crafted from ribs of thick metal that are welded together.

SPLITCH

Cast in resin and finished in gold leaf, this wall sculpture adds drama to any space. Lead designer Mandy Shanahan was inspired by ink splatter patterns and explored how it could add texture and dimension through craters on an otherwise smooth panel.

ACCESSORIES

DISCOVER an amazing assortment of sculptural accents that dress up any space. Truly the jewelry of the room, with hundreds of unexpected shapes, materials and finishes.

ONYX BOWLS

Bowls made of layers of sediments compressed over time – something so spectacular that only Nature could do. Skilled artisans hand-carve these stones, following the movement of the striated lines, bringing these one-of-a-kind pieces to your tabletop as extraordinary sculptural accessories.

SCULPTURE

REVOLVING TEAK SCULPTURES are dramatic in scale and sophisticated with their contrasting black metal frame. Mark Phillips travels the world in search of the extraordinary, and fell in love with these reclaimed roots that were lovingly unearthed and smoothed by hand.

COLOSSAL

Creating a sculpture from an innovative material that looks like an artifact is no small feat. Jessica Phillips loves how impactful these look, whether adorning a contemporary beach home exterior or against a wall inside a traditional space.
